Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-20 are rejected under 35 U.S.C. § 102(e) as being anticipated by U.S. Patent Application Publication #2004/0075748 to Rogers et al. ("Rogers" hereinafter). Rogers discloses an image-capture circuit, comprising:

a digitizer operable to receive a serial analog color signal having a predetermined sequence of color components, the digitizer having:

a plurality of channels 16 (see figure 2), each operable to process a respective color component; and

an analog-to-digital converter 38 operable to sequentially receive and digitize the color components; and

a controller (32, 34, 26) coupled to the digitizer and operable to couple each of the channels to the analog to digital converter in the predetermined sequence.

Re claim 2, see 36

Re claim 4, see 10

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U. S. Patent Application Publication #2004/0012830, 2004/008387 and 2003/0072497 and U. S. Patent #5,991,055 are cited for showing other analog front ends for scanners with separate channels, ADC and MUX.
